

HDMI Industrial Camera User Manual

HY-1137 Industrial Camera V1.1 (English Version)

Description:

- 1: Image sensor:16 megapixel CMOS Panasonic sensor
- 2: Adopt the 1/2.33 inch image sensor, the viewing angle is more broaden than 1/3 inch
- 3: HDMI output: 1080P 60fps
- 4: USB output: 1080P 30fps
- 5: Support one-key freeze/unfreeze
- 6: 16MP capture and 1080P video recording
- 7: Support 2.7K 30fps video recording
- 8: Support digital zoom in and zoom out
- 9: Support manual and auto exposure, support EV (exposure compensation) adjust
- 10: Support manual and auto white balance, there are red, green and blue can be adjusted.
- 11: Provide 10 lines, 5 horizontal line , 5 vertical line, any positions
- 12: Support cross hair on/off
- 13: Support TF card storage, max up to 64GB
- 14: Support remote control, it can help you to capture a more clear image
- 15: Support English and Chinese menu (the default language is English)
- 16: Support to save the setting default after power off

Feature:

- 1: Image sensor: 16 megapixel CMOS Panasonic sensor 1/2.33 inch
- 2: Pixel size: 1.335 μ m \times 1.335 μ m
- 3: HDMI output: 1920*1080 60fps
- 4: USB output: 1920*1080/30 1280*720/30 640*480/30 320*240/30 (MJPEG)
- 5: Lens interface: C/CS
- 6: Exposure: auto/manual
- 7: EV (exposure compensation): support
- 8: White balance: auto/manual, support RGB adjustment
- 9: Storage: TF card storage, max up to 64GB
- 10: Input voltage: DC 12V
- 11: Line: 10 lines, 5 horizontal line , 5 vertical line, any positions
- 13: Menu language: English/Chinese/Japanese/French/German/ Spanish
- 14: Remote control: support
- 15: Net weight:250g

Package include:

- HY-1137 camera x 1
- power supply x 1
- remote x 1
- USB line x 1
- User manual x 1

Description of the interface:

- 1: HDMI output interface
- 2: USB output interface
- 3: TF card storage interface
- 4: DC interface (noting: must be 12V)

Safety Guides

- 1 : When installing the equipment, please read the user manual carefully and follow the installation instruction, please kindly keep the manual for your reference. In order to provide our guest with a better customer experience, the product may have minor change during perfecting. the description in this instruction is only for reference, please take reference.
- 2: The camera power voltage is AC100V—240V@50-60Hz, please kindly make sure your power supply is in this range.
- 3 : The standard power supply of the camera is 12V 1A, we recommend you use the power adapter which came together with the camera.
- 4 : The camera should be stored between 0 °C to 50 °C , using with the humidity under 90%, prevent foreign object from entering the machine, do not spill liquid on the machine to prevent danger.

HDMI output

First, make sure the connected monitor is hd monitor, otherwise the resolution can not reach 1080P.

Second, power on the microscope and connect it to the hd monitor, make sure there is power on when using since there is no built-in battery.

Third, turn on the microscope, put the observation on the platform and adjust the working distance to get a clear image.

Under the HDMI output, the microscope can take picture, but can not record video.

FAQ

1: Why there is no image on the monitor?

Check if all the lines connected properly and power switch is turn on.

2: Why the image vague?

Please adjust the focal distance, lighting angle, check if there is dirt on the lens.

3: Why the remote control can not work?

There is no battery in the package, check if you has installed it.

4: Why there is no image on monitor when playback?

Maybe the video is not kept intact, or the video file is too large, and the system needs run time.

5: Why isn't the photograph clear?

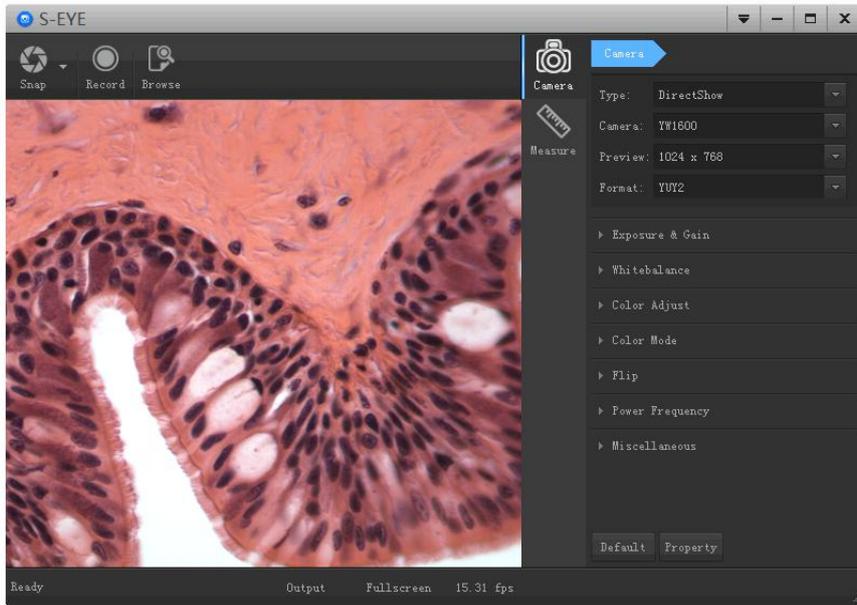

Please check whether the photo setting is the highest pixel.

6: Why it shows the TF card error?

First make sure it is a certified memory card, then format it and try again.

USB output

S-EYE User Manual

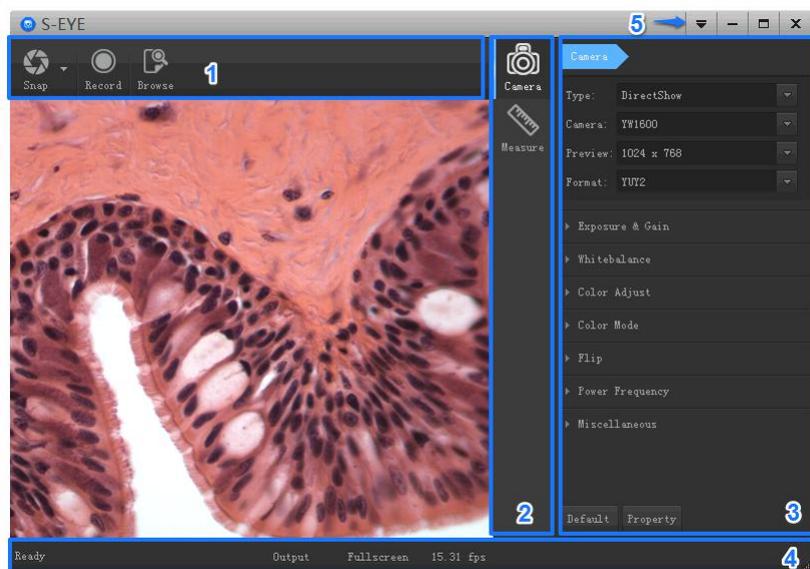

Overview

S-EYE is an application for imaging a dynamic image processing , has the following characteristics:

1. Support a variety of cameras, can switch at any time to use.
2. Using GPU rendering for image previewing, support for live image display of high-resolution and high frame rates.
3. Support dynamic image measurement function.
4. The software interface is easy to operate.

User Interface

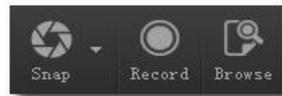

1. Toolbar: Take pictures/Recording video/Browse files.

2. Sidebar tab: Switching the rightmost control panels, currently provides camera control and measurement functions.
3. Control panel: Specific camera control and measurement operations.
4. Status bar: Display camera information, Change user interface view, Toggle measure result panel.
5. Main menu: Open setting dialog, show software information, etc.

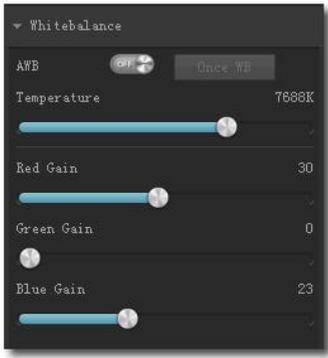

Capture Images

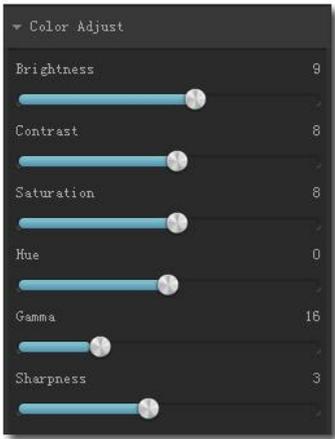

You can capture pictures and videos:

1. Take a picture: Click “Snap” button to take a picture. Click the right arrow beside the “Snap” button to set picture file format and resolution.
2. Recording: Click “Record” button to start video recording, Click again to stop recording. When recording ,there will be an animation indicator over the image.
3. Browse: Click “Browse” button to open the folder where pictures and video stored.

Camera Control

	<p>Device Control:</p> <ul style="list-style-type: none"> ● Support different cameras, preview resolution and output format. ● The highest resolution is 1920x1080.
	<p>Exposure and Gain:</p> <p>If the connected camera can not support some functions such as brightness target value, then the corresponding parameter can not be set up</p>
	<p>White balance:</p> <p>If the connected camera can not support some functions such as brightness target value, then the corresponding parameter can not be set up</p> <p>Red, Green and Blue gain:</p> <p>If the connected camera can not support some functions such as brightness target value, then the corresponding parameter can not be set up</p>

	<p>Normal camera parameter adjustment.</p>
	<ul style="list-style-type: none"> ● Reset camera parameters. ● Open camera property dialog, generally supported by the DirectShow cameras

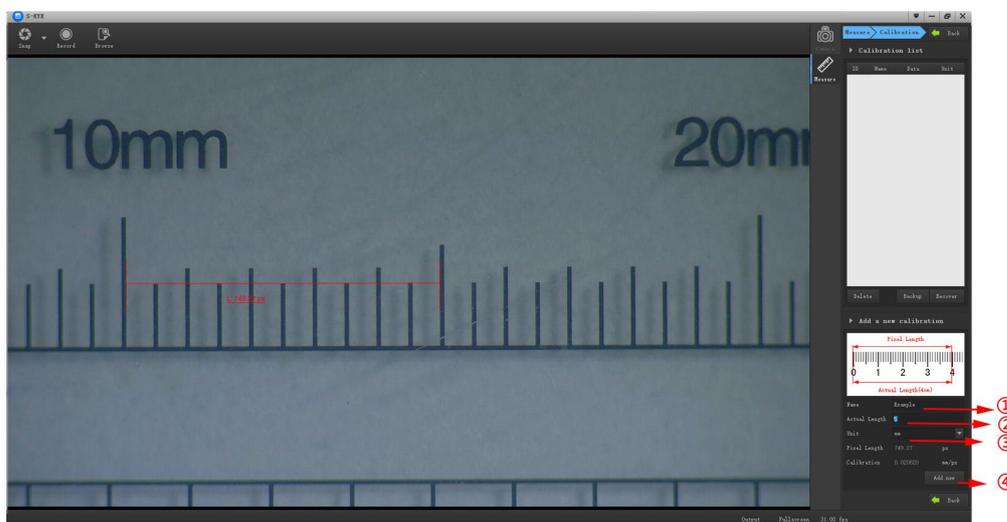

Measurement

Icon	Function	Description
	Move	Move or adjust the measurement tool.
	Point	Draw a marker over the image.
	Line	Measure length of a line.
	Break line	Measure length of break line, right click to finish drawing.
	Rectangle	Measure perimeter and acreage of a rectangle.
	Polygon	Measure perimeter and acreage of a polygon.
	Circle	Measure a circle, the circle is determined by center point and radius.
	Two Points Circle	Measure a circle, the circle is determined by two points.
	Three Points Circle	Measure a circle, the circle is determined by three points.
	Arc	Measure length of arc.
	Angle	Measure angle.
	Perpendicular	Measure the distance from a point to a line.

	Delete	Delete one measurement tool.
	Delete all	Delete all measurement tools.
	Export	Export measurement result to file.

How to define the measurement

Take a 5mm measurement as example

1. Fill in a custom name
2. Fill in the actual size on the scale
3. Choose the scale base(such as: px, cm, mm, um, in, uin)
4. Complete the setting
5. The below picture shows the 5mm measurement result

Thanks

Thanks all of you for supporting our products. We hope you enjoy our products, and would be glad if they can even just slightly make your life better. If you have any question, or any advice and feedbacks, please feel free to contact us: hayear@hayear.com .We' d like to provide the best service to you. Our official website is <http://www.hayear.com/>. We reserve all the right for the final explanation.
